

**Computers with CAN Bus protocol
for e-Vehicles application**

SmartView - series

The STARS “SmartView - Series”
CAN bus display for STARS motor controllers

General Features include :

- Multi-functional LCD electric vehicle computers indicate bar-graphics for battery voltage, driving current, controller temperature.
- Build-in CAN bus protocol V2.0.
- System error code message from controller.
- Individual control LED indicators for different purpose indicators.
- Odometer and total running timer are stored in memory.
- Build-in backlight
- Excellent water resistant, anti-vibration structure and noise immunity design.

Specifications:

Power Input	DC12V
Speed Sensor	Protocol signal
Power Consumption	5mA at on status without backlight 45mA with backlight
Dimensions	130.1 X 82.8 X 27.0 mm
